ACKNOWLEDGMENTS

The structure contours from which these bedded and diapiric map features are illustrated were compiled with revisions from published structure maps, cross sections, and well control data included in Selected References.

Diapiric and bedded salt mapping and map production were supported by the USGS National Cooperative Geologic Mapping Program (NCGMP) through STATEMAP award G22AC00495 (Jeffrey G. Paine, Principal Investigator), and partly by the Bureau of Economic Geology STARR funds for energy research. Graphics were by Francine M. Mastrangelo. Views and conclusions contained in this map should not be interpreted as necessarily representing the official policies, either expressed or implied, of the U.S. Government. The authors disclaim any responsibility or liability for interpretations from this map, digital data, or decisions based thereon.
