

Plate 2a. Photograph of the disconformable contact between the Buda and Eagle Ford formations, that is, the Upper Cretaceous and Comanchean, as seen in a cut of the Southern Pacific Railroad, about four miles west of Shumla. Photograph by Beede.

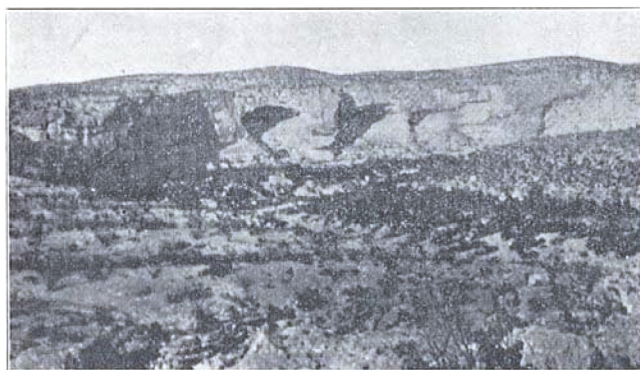

Plate 2b. Topography and caves in Comanchean limestones about one mile southeast of Langtry. The caves shown are on the Texas side, on the north wall of the Rio Grande River canyon. Photograph by Beede.
