

**SANDSTONE ISOLITH
 MAP OF INTERVAL 1**

EXPLANATION

- CONTOURS ON NET SAND THICKNESS
- CONTOUR INTERVAL VARIABLE
- >10 FEET SANDSTONE (FLUVIAL-DELTAIC SYS.)
- >50 FEET SANDSTONE (SLOPE SYSTEM)
- EQUIVALENT OUTCROPPING SANDSTONE UNITS
- INFERRED SEDIMENT DISPERSAL ROUTES
- SUBJACENT SHELF EDGES
- WELL SITE WITH NET THICKNESS OF SANDSTONE (zero values not shown)

Breakup of Breckenridge Limestone and its shelf-edge bank equivalents precludes exact correlation of shelf edges.
